**Section I. Catalysts**

Solid catalysts studied under operating conditions
J.M. Thomas, G.N. Greaves and C.R.A. Catlow . . . . . 1
Combined use of X-ray absorption and diffraction in the study of $Pt/TiO_2–SiO_2$ catalyst
A. Muñoz-Paez and A. Justo . . . . . 11
XAS study of transition metal ions in hydrotalcite-like compounds
P. Malet, J.A. Odriozola, F.M. Labajos, V. Rives and M.A. Ulibarri . . . . . 16
A new furnace design for use in combined X-ray absorption and diffraction of catalysis and ceramics studies: formation from carbonate precursors of Cu, Co, Mn spinels for the oxidation of CO and the formation of PLZT, a piezoelectric ceramic
A.J. Dent, G.N. Greaves, M.A. Roberts, G. Sankar, P.A. Wright, R.H. Jones, M. Sheehy, D. Madill, C.R.A. Catlow, J.M. Thomas and T. Rayment . . . . . 20
XANES study of Ti and Fe substituted silicalites in presence and in absence of $NH_3$ and comparison with UV-vis, IR and Raman spectra
S. Bordiga, F. Geobaldo, C. Lamberti, A. Zecchina, F. Boscherini, F. Genoni, G. Leofanti, G. Petrini, M. Padovan, S. Geremia and G. Vlaic . . . . . 23
Environmental cells for in situ X-ray diffraction and X-ray absorption spectroscopic studies of heterogeneous catalysts
G.D. Moggridge, S.L.M. Schroeder, R.M. Lambert and T. Rayment . . . . . 28
An in situ EXAFS study of a $Pt–Rh/Al_2O_3$ three-way catalyst operating under a controlled gas mixture (CO, NO, $C_3H_8$, $O_2$)
V. Pitchon, C. Howitt, F. Maire, D. Bazin, P. Bernhardt and G. Maire . . . . . 33
EXAFS investigation of divalent metal ion substituted AlPOs
G. Sankar, J.M. Thomas, J. Chen, P.A. Wright, P.A. Barrett, G.N. Greaves and C.R.A. Catlow . . . . . 37
An Exafs characterisation of the highly dispersed bimetallic platinum–palladium catalytic system
D. Bazin, A. Triconnet and P. Moureaux . . . . . 41
Computer simulation of Fe-ZSM5 — comparison to EXAFS studies
D.W. Lewis, G. Sankar, C.R.A. Catlow, S.W. Carr and J.M. Thomas . . . . . 44
ASAXS studies of carbon supported electrocatalysts
H.-G. Haubold and X.H. Wang . . . . . 50

**Section II. Ceramics**

Minerals at high pressure
L.W. Finger . . . . . 55
High resolution powder diffraction studies of polycrystalline materials
A.N. Fitch . . . . . 63
Atomic environments in superionic materials
P. Fornasini . . . . . 70

0168-583X/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved

XAS study of lithium nickel oxide
A. Rougier, A.V. Chadwick and C. Delmas . . . . . 75

Time evolution of the structure function and dynamical scaling in porous $SnO_2$ dry gels
A.F. Craievich, C.V. Santilli and S.H. Pulcinelli . . . . . 78

XRD, EXAFS and XANES studies of new bismuth cubic or pseudo-cubic perovskite-type phases
A. Demourgues, C. Dussarrat, R. Bontchev, B. Darriet, F. Weill and J. Darriet. . . . . 82

Kinetic studies of the crystallisation of coesite using synchrotron radiation
P. Zinn, J. Lauterjung and E. Hinze. . . . . 89

Determination of inhomogeneous residual stress states in surface layers of machined engineering ceramics by synchrotron X-rays
B. Eigenmann and E. Macherauch . . . . . 92

Development of large volume reaction cells for kinetic studies using energy-dispersive powder diffraction
S.M. Clark, A. Nield, T. Rathbone, J. Flaherty, C.C. Tang, J.S.O. Evans, R.J. Francis and D. O'Hare . 98

Anomalous scattering and DAFS measurements of small single crystal of barium platinum oxide
J. Vacínová, J.L. Hodeau, P. Wolfers, E. ElKaïm, J.P. Lauriat, B. Bouchet-Fabre and B.L. Chamberland . . . . . 102

In situ study of ceramic formation from $Co^{2+}$ and $Zn^{2+}$ exchanged zeolite-A using combined XRD/XAFS techniques
L.M. Colyer, G.N. Greaves, A.J. Dent, K.K. Fox, S.W. Carr and R.H. Jones . . . . . 107

A high-temperature XAFS study of the iron oxides
K.D. Becker, D. Niemeier, S. Wissmann, M. Oversluizen, J.W. Couves and A.V. Chadwick . . . . . 111

Site selectivity of DAFS analysis on hexaferrite at Fe K edge by using both monochromatic optics and energy dispersive optics
J.L. Hodeau, J. Vacínová, P. Wolfers, Y. Garreau, A. Fontaine, M. Hagelstein, E. Elkaïm, J.P. Lauriat, A. Collomb and J. Muller . . . . . 115

Crystal structure of low temperature form of $Bi_6V_3O_{16}$ determined by Rietveld refinement of synchrotron radiation powder diffraction data: A new mixed valence Aurivillius phase
O. Joubert, A. Jouanneaux and M. Ganne . . . . . 119

Vacancy-induced fine structure in the K edges of sub-stoichiometric titanium and vanadium nitrides
J.-M. Mariot, P. Parent, A. Traverse, W. Lengauer and C.F. Hague. . . . . 123

X-ray absorption study on nanostructured zirconia and yttria
R. Nitsche, M. Winterer, M. Croft and H. Hahn . . . . . 127

Influence of the cerium – oxygen charge transfer energy on the cerium excitation spectra of oxides. A Ce $L_3$ XAS study of cerium doped yttrium oxide
L. Douillard, M. Gautier, N. Thromat and J.P. Duraud . . . . . 133

Phase coexistence in PZT ceramic powders
J.C. Fernandes, D.A. Hall, M.R. Cockburn and G.N. Greaves . . . . . 137

EXAFS study of the interaction of lanthanide cations with layered clays upon hydrothermal treatments
A. Muñoz-Páez, M.D. Alba, R. Alvero, A.I. Becerro, M.A. Castro and J.M. Trillo . . . . . 142

**Section III. Superconductors**

Are high $T_c$ superconductors doped bipolaronic insulators?
N.F. Mott . . . . . 145

Polarization-dependent photoemission studies of the electronic structure of $La_2CuO_{4+x}$ single crystals
D.S.-L. Law, M.N. Mikheeva, V.G. Nazin, A.V. Svishchev, M.B. Tsetlin and O.E. Parfionov . . . . . 148

Radiative defects structure in HTSC thin films: polarized XAS study
A.P. Menushenkov, A.Y. Ignatov, V.A. Chernov and S.G. Nikitenko . . . . . 151

**Section IV. Glasses**

Cations in glasses under ambient and non-ambient conditions
G. Calas, G.E. Brown, F. Farges, L. Galoisy, J.P. Itie and A. Polian . . . . . 155

Amorphous silica studied by high energy X-ray diffraction
H.F. Poulsen, J. Neuefeind, H.-B. Neumann, J.R. Schneider and M.D. Zeidler . . . . . 162
XAFS study of CdSe quantum dots in a silicate glass
A. Demourgues, G.N. Greaves, R. Bilsborrow, G. Baker, A. Sery and B. Speit . . . . . 166
Contribution of XAFS analysis to the study of the correlation between optical nonlinearity and the geometry of titanium sites in glasses
T. Cardinal, E. Fargin, Y. Le Luyer, G. Le Flem, L. Canioni, P. Segonds, L. Sarger, F. Adamietz and A. Ducasse . . . . . 169
Low Z elements (Mg, Al, and Si) K-edge X-ray absorption spectroscopy in minerals and disordered systems
Ph. Ildefonse, G. Calas, A.M. Flank and P. Lagarde . . . . . 172
Use of synchrotron techniques for a structural study of germanium chalcogenide glasses
P. Armand, A. Ibanez and E. Philippot . . . . . 176
Awaxs study of amorphous $WO_3$ and $WO_3 \cdot nH_2O$
B. Bouchet-Fabre, S. Laruelle and M. Figlarz . . . . . 180
SAXS/WAXS studies of the devitrification of Cr-doped cordierite glass using synchrotron radiation
M. Oversluizen, W. Bras, G.N. Greaves, S.M. Clark, J.M. Thomas, G. Sankar and B. Tiley . . . . . 184
ASAXS – a method for investigating primary crystallisation and phase separation of glasses
R. Brückner, U. Lembke and R. Kranold . . . . . 190
Characterisation of phase transformations in glasses by small-angle scattering of X-rays and neutrons
U. Lembke, R. Kranold and R. Brückner . . . . . 194
Local order in sol–gel derived glassy $TiO_2$
G. Antonioli, D. Bersani, P.P. Lottici, I. Manzini, G. Gnappi and A. Montenero . . . . . 198
Microstructural investigation of aggregates formed from aged silica sols by STXM
W.D. Shi, G.R. Morrison, M.T. Browne, T.P.M. Beelen, H.F. van Garderen and E. Pantos . . . . . 202
EXAFS study of short range order in Fe–Zr amorphous alloys
M.L. Fernández-Gubieda, P. Gorria, J.M. Barandiarán and L. Fernandez Barquín . . . . . 206

**Section V. Polymers**

New insights into the structure and phase transitions of polymers
H.G. Zachmann . . . . . 209
Using synchrotron radiation to study polymer processingsub
A.J.R.M.J. Elwell and W. Bras . . . . . 216
Diffraction and diffuse scattering from materials with microfocussed X-rays
C. Riekel and P. Engström . . . . . 224
Aggregation and aging in silica gel
R.A. van Santen, T.P.M. Beelen, H.F. van Garderen, W.H. Dokter and E. Pantos . . . . . 231
Time-resolved X-ray wide angle scattering studies of the effect of draw rate and temperature on the development of orientation and crystallinity in PET
A. Mahendrasingam, C. Martin, A. Jaber, D. Hughes, W. Fuller, R. Rule, R.J. Oldman, D. MacKerron and D.J. Blundell . . . . . 238
Real time SAXS/WAXS/DTA measurements of the crystalline/amorphous transition of low molecular weight hydrogenated polybutadiene
R. Haswell, J.B. van Mechelen, C.T.J. Mensch and H. de Groot . . . . . 242
Time-resolved 2D SAXS studies of oriented polymers using paracrystalline modelling techniques
R.J. Rule and T.M.W. Nye . . . . . 248
Simultaneous time-resolved synchrotron X-ray scattering studies on block copoly(ether-urethane) phase behaviour
S. Naylor, W. Bras, G. Derbyshire, G.R. Mant, D. Bogg and A.J. Ryan . . . . . 253
Structure development studies during materials processing
W. Bras, G.E. Derbyshire, J.A. Bouwstra, M. Oversluizen and W. Dokter . . . . . 257

A synchrotron SAXS study of the structure development kinetics during the reactive processing of flexible polyurethane foam
M.J. Elwell, S. Mortimer, A.J. Ryan and W. Bras . . . . . 261
The use of an imaging plate as a detecting system in X-ray diffraction of polymers
D. Villers, C. Fougnies, L. Paternostre, C. Beumier and M. Dosière . . . . . 265
Time-resolved X-ray studies of polymorphism in isotactic polybut-1-ene
J. Cooke, A.J. Ryan and W. Bras . . . . . 269
Quantitative studies of the radiation chemical behaviour of PMMA and poly(lactides)
O. Wollersheim, H. Zumaqué, J. Hormes, D. Kadereit, J. Langen, L. Häußling, P. Hoessel and G. Hoffmann . . . . . 273
Structure-property relations in multiblock copoly(ether-urea)s studied by SAXS, DSC and thermo-mechanical techniques
A. Marcos-Fernández, A.J. Ryan and L. González . . . . . 279
SAXS study of deformation mechanisms in liquid rubber-toughened polystyrene
G.J. Salomons, M.A. Singh, L.G. Hiltz, L.H. Pan and W.R. Newson . . . . . 282
Thermal ageing of electrically conducting polymers: XANES measurements of polythiophenes
I. Winter, J. Hormes and M. Hiller . . . . . 287
EXAFS studies on cobalt polymer electrolytes
W. Schlindwein, R. Pynenburg, R. Latham and R. Linford . . . . . 292

**Section VI. Biomaterials**

Biological superstructures: the materials of biology
M.H.J. Koch . . . . . 295
Scattering of soft X-rays, techniques in small-angle scattering and in single crystal diffraction
G. Scholl, F. Dauvergne, A. Gabriel, M. Hütsch, M. Marmotti, Z. Sayers, S. Stuhrmann, J. Thomas, C. Trame and H.B. Stuhrmann . . . . . 303
Synchrotron radiation powder diffraction studies of thermally deposited coatings of Hydroxylapatite
C.M. Roome and C.D. Adam . . . . . 308

**Section VII. Materials for electronics**

The environment of lattice sites during thermal epitaxial regrowth of ion beam amorphized silicon
S. Kalbitzer, G.N. Greaves, A.J. Dent, G. Derst and G. Müller . . . . . 312
Exploring macroscopic surface structures on X-ray CCDs using silicon absorption edge quantum efficiency measurements
A. Keay, A. Owens, S.J. Gurman, G.W. Fraser, K.J. McCarthy and A. Wells . . . . . 316
The local structure of porous silicon studied by EXAFS
G. Dalba, P. Fornasini, M. Grazioli, R. Grisenti, Y. Soldo and F. Rocca . . . . . 322
The optical response of porous silicon under different excitation energies
Q. Zhang, S.C. Bayliss, A. Al-Ajili and D.A. Hutt . . . . . 326
The blue photoluminescence and nanostructure of Si and C clusters embedded in $SiO_2$ matrices
Q. Zhang, S.C. Bayliss, A. Al-Ajili, D.A. Hutt and P. Harris . . . . . 329
Depth resolved investigations of the relaxation behaviour in strained GaInAs/GaAs superlattices using grazing incidence X-ray diffraction
D. Rose, U. Pietsch, A. Förster and T.H. Metzger . . . . . 333
Complementary X-ray topography and near-surface diffraction for investigations into the structure of ion-implanted optical waveguides
R.S. Lowther-Harris, S.D. Brown, P.W. Haycock, P.J. Chandler, L. Zhang, C.C. Tang, R.P. Findlay, L. Babsail, M. Rodman, J. Knight and P.D. Townsend . . . . . 337
Plane wave GID topography of defects in lithium niobate after diffusion doping
D.V. Novikov, T. Gog, M. Griebenow, G. Materlik, I. Baumann and W. Sohler . . . . . 342

Visualization of acoustic fields in surface acoustic wave devices by means of X-ray topography
E. Zolotoyabko, E. Jacobsohn, H. Bartunik, I. Polikarpov, I. Koelln and H.G. Krane . . . . . 346

Temperature dependent EXAFS measurements on YGG during a sol-gel process
C. Landron, N. Gautier, A. Douy, J.P. Coutures and D. Bazin . . . . . 351

Structural studies of semiconductors at very high pressures
J. Maclean, P.D. Hatton, R.O. Piltz, J. Crain and R.J. Cernik . . . . . 354

**Section VIII. Surfaces and interfaces**

Surface X-ray crystallography of growing crystals and interfaces
E. Vlieg, M. Lohmeier and H.A. van der Vegt . . . . . 358

High resolution core-level spectroscopy study of low-coverage lithium adsorption on the Si(100)$2 \times 1$ surface
L.S.O. Johansson, T.M. Grehk, S.M. Gray, M. Johansson and A.S. Flodström . . . . . 364

Photoemission study of K on GaAs(100) and InP(100) surfaces with synchrotron radiation
P.S. Xu, E.D. Lu, S.H. XU, X.J. Yu, H. Ji, Q. Liang and T.X. Zhao . . . . . 368

Core level spectra of clean "$2 \times 8$" vicinal Si(110)
N. Safta, J.P. Lacharme, A. Cricenti, A. Taleb-Ibrahimi, G. Indlekofer, V. Aristov, C.A. Sébenne, G. Le Lay and B. Nesterenko . . . . . 372

An oxygen XAFS study of sodium disilicate glass surfaces
G.J. Baker, G.N. Greaves, M. Surman and M. Oversluizen. . . . . 375

An in-situ study of the surface phase transitions of $\alpha$-$Fe_2O_3$ by X-ray absorption spectroscopy at the oxygen K edge
M. Pollak, M. Gautier, N. Thromat, S. Gota, W.C. Mackrodt and V.R. Saunders . . . . . 383

Bond lengths at buried InAsP/InP interfaces in InP/InGaAs multi quantum wells
F. Boscherini, S. Pascarelli, C. Lamberti, S. Bordiga and G.M. Schiavini . . . . . 387

A NEXAFS study of the bonding of corrosion inhibitors on ZnO($10\bar{1}0$)
J.F. Walsh, H.S. Dhariwal, A. Gutiérrez-Sosa, R. Lindsay, G. Thornton and R.J. Oldman . . . . . 392

Surface modification of oxide materials subjected to low energy ion bombardment: a XAS study
A. Caballero, J.P. Espinós, A. Fernández, D. Leinen and A.R. González-Elipe . . . . . 397

Specular and off-specular anomalous X-ray scattering as quantitative structural probes of multilayers
H.E. Fischer, H. Fischer, O. Durand, O. Pellegrino, S. Andrieu, M. Piecuch, S. Lefebvre and M. Bessière . . . . . 402

Thickness determination of thin solid films by angle-resolved X-ray fluorescence spectrometry using monochromatized synchrotron radiation
W. Schmitt, P. Drotbohm, J. Rothe, J. Hormes, C.R. Ottermann and K. Bange . . . . . 407

SR-induced dry etching of semiconductors for microstructuring
B. Li, U. Streller, H.-P. Krause, I. Twesten and N. Schwentner . . . . . 412

Comprehensive structure investigation of Langmuir Blodgett films of disc-shaped molecules
J. Reiche, D. Janietz, T. Baberka, D. Hofmann and L. Brehmer . . . . . 416

Formation of the Schottky barrier at $(3 \times 1)$Na/Si(111) surface
X.S. Zhang, C.Y. Feng, H. Sui, S. Bao, Y.B. Xu, P.S. Xu, S.H. Xu and H.B. Pan . . . . . 420

K promoted oxidation and nitridation on InP(100) surface: A soft-X-ray photoemission study
P.S. Xu, S.H. Xu, E.D. Lu, X.J. Yu, H. Ji, Q. Liang and T.X. Zhao . . . . . 423

Silicon oxide structures measured at the surfaces of silicon and silicate glass: a reflectivity study
G.E. van Dorssen, G. Derst, G.N. Greaves, A.D. Smith and M. Roper . . . . . 426

Unusual behaviour of surface shifted core levels on Be(0001) and Be($10\bar{1}0$)
L.I. Johansson and H.I.P. Johansson . . . . . 430

**Section IX. Magnetism**

Magnetic and structural X-ray dichroïsms of metallic multilayers
S. Pizzini, A. Fontaine, F. Baudelet, S. Minr, C. Giorgetti, E. Dartyge, J.F. Bobo and M. Piecuch . . . 436

X-ray resonant magnetic scattering at L edges of 3d transition metals in multilayers
J.M. Tonnerre, L. Sève, D. Raoux, B. Rodmacq, M. De Santis, P. Troussel, J.M. Brot, V. Chakarian, C.C. Kao, E.D. Johnson and C.T. Chen . . . . . 444

Magnetic circular dichroism in the X-ray fluorescence spectra of iron and a glassy-metal iron alloy
C.F. Hague and J.-M. Mariot . . . . . 449

Soft X-ray magnetic circular dichroism in molecular based magnets
M.-A. Arrio, Ph. Sainctavit, Ch. Cartier dit Moulin, Ch. Brouder, F.M.F. de Groot, T. Mallah and M. Verdaguer . . . . . 453

Magnetic X-ray circular dichroism at uranium M-edges in US
S.P. Collins, D. Laundy and C.C. Tang . . . . . 457

Magnetic, XANES and EXAFS studies of $CeCo_xSn_2$ ($0.35 \leq x \leq 0.5$) stannides
A. Demourgues, B. Chevalier, F. Fourgeot, J. Darriet and J. Etourneau . . . . . 460

An in-situ investigation of the $Fe_3Si$ crystallization in amorphous $Fe_{73.5}Si_{15.5}B_7Cu_1Nb_3$
A. Danzig, N. Mattern and S. Doyle . . . . . 465

Charge density waves and strain waves in thin epitaxial Cr films
P. Sonntag, P. Bödeker, K. Bröhl, T. Thurston and H. Zabel . . . . . 468

**Section X. Metals and alloys**

A new approach to the determination of charge transfer in metal alloys
P. Weightman, R.J. Cole, N.J. Brooks and J.M.C. Thornton . . . . . 472

A study of the formation of intermetallic phases in the Fe–Zn system using an image plate detection system
F. Rizzo, S. Doyle and T. Wroblewski . . . . . 479

High pressure and high temperature investigations on intermetallic compounds using energy-dispersive X-ray powder diffraction
T. Peun, J. Lauterjung and E. Hinze . . . . . 483

ASAXS and SANS investigations of the chemical composition of irradiation-induced precipitates in nuclear pressure vessel steels
M. Große, F. Eichhorn, J. Böhmert, G. Brauer, H.-G. Haubold and G. Goerigk . . . . . 487

X-ray diffuse scattering of quenched copper single crystals
H. Maeta, K. Yamakawa, N. Matsumoto, K. Haruna, T. Kato and F. Ono . . . . . 491

A ReflEXAFS study of the local structural changes around implanted yttrium ions during the high temperature oxidation of Ni–20Cr
P.N. Gibson and T.A. Crabb . . . . . 495

**Section XI. Recent developments**

Synchrotron radiation and industrial research
R.P. Townsend . . . . . 499

New possibilities in the X-ray domain
Y. Petroff . . . . . 505

Present status of the SPring-8 project
H. Ohno . . . . . 509

Potential opportunities for materials research at the advanced photon source
T.I. Morrison, P. Bandyopadyhay and P.R. Jemian . . . . . 515

First diffraction topographic results at a third generation synchrotron radiation facility: application to crystals under an electric field
P. Rejmánková and J. Baruchel . . . . . 518

QEXAFS in seconds at an undulator source
J. Als-Nielsen, G. Grübel and B.S. Clausen . . . . . 522

Synchrotron Mossbauer spectroscopy of powder samples
E.E. Alp, W. Sturhahn and T. Toellner . . . . . 526

Luminescence of solids excited by synchrotron radiation
V.V. Mikhailin . . . . . 530
Combined small angle X-ray scattering (SAXS) and Fourier transform infrared (FT-IR) spectroscopy in a time resolved mode using synchrotron radiation
D. Bogg, G.E. Derbyshire, W. Bras, J. Cooke, M.J.A. Elwell, S. Naylor and A.J. Ryan . . . . . 536
Differential anomalous scattering study of probe molecules
B. Bouchet-Fabre, P. D'Angelo and N.V. Pavel . . . . . 539
DEDXS: the differential energy-dispersive X-ray spectroscopy system and its use in electric field modulation studies
G.T. Addison, C.S.G. Cousins, S.M. Flood, M. Hamichi, R.E. Meads, F. Miners and B.J. Sheldon. . . 543
Modelisation by finite elements of sagittal focusing
J.L. Hazemann, K. Nayouf and F. de Bergevin . . . . . 547
Influence of secondary effects on the structure quality in deep X-ray lithography
F.J. Pantenburg and J. Mohr . . . . . 551
Use of new image-plate techniques in synchrotron radiation studies of materials and processes
G. Bushnell-Wye, J.L. Finney and J.D. Wicks . . . . . 557
A novel high dynamic range X-ray detector for synchrotron radiation studies
S. Cockerton, B.K. Tanner and G. Derbyshire . . . . . 561
XSPRESS – X-ray signal processing electronics for solid state detectors
R. Farrow, G.E. Derbyshire, B.R. Dobson, A.J. Dent, D. Bogg, J. Headspith, R. Lawton, M. Martini and K. Buxton . . . . . 567
Doping of RbCl and $KCaCl_3$ with alkali ions to obtain fast scintillators
E.N. Mel'chakov, P.A. Rodnyi, N.G. Zakharov, A. Hopkirk, I.H. Munro and D. Shaw . . . . . 572
Nanocrystalline nickel doped zinc oxide gas sensors
N.V. Russell, A.V. Chadwick and A. Wilson . . . . . 575
A ReflEXAFS apparatus for use with soft X-rays in the sub-4-keV energy range
A.D. Smith, M.D. Roper and H.A. Padmore . . . . . 579
X-ray diffraction study of the structure and phase transitions of $C_{60}$-clathrates
M. Tegze, G. Bortel, G. Faigel, G. Oszlányi, S. Pekker and P.W. Stephens . . . . . 585
Author index . . . . . 589
